The Right "Acumen" to Get Ahead

The ancient Greek philosopher Heraclitus once famously said that "Nothing endures but change." This rings true even today. The world is constantly changing; be it the environment, the food we eat or even individual chemical compositions. Consequently, products being manufactured need to be constantly tested and analysed to ensure their safety and quality are consistently maintained.

This is where we come in. Established in early 2009, Acumen Scientific Sdn. Bhd. (Acumen) resulted from the pooling together of extensive technical resources and capabilities that spans over three decades to offer a wide range of integrated analytical services to support the quality, reliability and environmental compliance as well as other international regulatory requirements of our customers. Today, we have built a formidable customer base in the international arena.

As an MS ISO/IEC 17025 certified company, we are approved by the Food Safety and Quality Division of the Malaysian Ministry of Health to perform tests for Health Certificate applications for the purpose of food export.

In addition to food-related testing, we also provide a full range of environmental consultancy services to support both local and international regulatory programmes. Among others, we offer Chemical Health Risk Assessment (CHRA) – a comprehensive assessment of risk exposure of employees to hazardous chemicals in the workplace; and Stack Emission monitoring – to ensure organizations' compliance with Environmental Quality Act (Clean Air) Regulation 1978 in Malaysia. On a larger scale, we also have the capabilities to support international standards including the EU's Restriction of Hazardous Substance (ROHS) and Registration, Evaluation, Authorisation and Restriction of Chemical (REACH) regulations.

Acumen is a business arm of conglomerate powerhouse Texchem Group of Companies, the holding company of market leaders in diverse industries that include trading, manufacturing and service provision. For more information on the services we provide, log on to www.acumen.com.my.

Acumen Analysis Solutions in Malaysia
